**REQUEST FOR QUALIFICATIONS/PROPOSALS**  
**EDA PROJECT #08-79-05671**

Request for Qualifications/Proposals: The Port of South Louisiana ("POSL") is currently seeking architectural and engineering services for an anticipated capital project H 2 Public Private Partnerships Hydrogen Fueling Barge ("H 2 P3"). The

## Public Notices

Port of South Louisiana (POSL) is a political subdivision of the state of Louisiana. The 54-mile jurisdiction of the POSL extends along the Mississippi River and across three parishes: St. Charles, St. John the Baptist, and St. James. It is an industrial region known for its petroleum refining, grain and petrochemical transfer and storage facilities. The H 2 Public Private Partnership Hydrogen Fueling Barge ("H 2 P3") is an infrastructure investment at the Port of South Louisiana that will provide a clean fueling station for a new fleet of hydrogen-powered river vessels. This bunkering (fueling) barge will catalyze the construction and launch of a new fleet of low-carbon vessels, fueled by methanol (a hydrogen-derivative), in the lower Mississippi River corridor. The H 2 P3 Hydrogen Fueling Barge will be the first dedicated methanol/hydrogen-fueled vessel in the U.S. and only the second in the world. Scope of Work: The H 2 P3 Hydrogen Fueling Barge will be located on the Mississippi River near the POSL's Globalplex, a 335-acre multimodal maritime industrial park, owned by the POSL. The area is ideal for both vessels and barges, as it provides handling and storage for bulk, breakbulk, and containerized cargos. The successful respondent will design a state-of-the-art hydrogen fueling barge at the Port of South Louisiana that will serve as a clean fueling station for a new fleet of hydrogen-powered river vessels along the Lower Mississippi River. The project components include the construction of an approximately 30,000 Barrels (BBL) Methanol Inland Tank bunkering barge that will be approximately 297 feet long x 54 feet wide x 11 feet tall.

The scope of this project will be the construction of a bunkering fueling barge at the Port of South Louisiana that will service e-methanol fueled vessels. The Port of South Louisiana desired Small and Emerging Business (SEB)/Disadvantaged Business Enterprise (DBE) goal for this project is 25%. Should your firm meet this goal or wish to meet this goal with the utilization of other firms, please identify all firms upon submittal of your proposal, and include their role and estimated percentage (%) of participation within your design team. Below are links to directories for a list of such firms.
